

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name DJ

Your Name Dhushan Kiritharan

Your Team Member's Name Jacob Dias

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
 - Did a version of iteration zero with my partner
 - Implemented iteration 1A
 - Implemented iteration 2A
 - Implemented feature 2 and feature 3 of Iteration three
2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
 - Did a version of iteration zero
 - Implemented iteration 1B
 - Implemented iteration 2B
 - Implemented feature 1 of iteration three
3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

The experience was very positive and my partner was always efficient and timely in completing his side of the functionalities. However, one thing that could be improved upon is making sure that our files work together cohesively in terms of naming and interacting with each others functions as debugging the interactions between the functions and classes was time consuming and could have been avoided if we were to sort it out as e were coding.
