COMPENG 2SH4 Project – Statement of Contribution

Your Group Name   DJ

Your Name   Jacob Dias

Your Team Member's Name   Dhushan Kiritharan

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

    - Completed a version of iteration 0 to practice special member functions
    - Completed iteration 1b
    - Completed iteration 2b
    - Completed iteration 3 feature 1

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

    - Completed a version of iteration 0 as well for good practice
    - Completed iteration 1a
    - Completed iteration 2a
    - Completed features 2 and 3 of iteration 3
    - Did the majority of debugging when files were combined

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

    Our communication as partners was very good and both of us regularly updated each other on our progress on our assigned topics. We could have gotten started a bit earlier on the project to allow more time to work on the bonus. Also, our overall file organization with the different names of functions in each iteration push made it more difficult to arrive at a functioning final product.
